- **Heat-Away Stabilizer:**
  - 1 Heat-Away Film 8x10 sheet
- **Fusible Web:**
  - 1 Perfect Appliqué sheet

[Sulky KK 2000™ Temporary Spray Adhesive](#) helps secure the towels to stabilizer, when an adhesive stabilizer isn't recommended or used. The spray is air-soluble, so it dissipates after 48-72 hours. It will not gum up the needle, even when used in multiple layers, such as for layered appliqués done in the hoop.

[Curved Tip Squeezers](#) are great for trimming jump threads during the embroidery stitchout. These snips have curved tips, as their name suggests, allowing you to get close to the stitching without puncturing through it or harming the fabric base.

There's a sample of [Sulky Perfect Appliqué Fusible Web](#) included in the [Stabilizer Sampler](#), inside the kit for this Session. It is just enough product for one stitchout of the Summer Fruit Popsicles appliqué embroidery design. You may want to purchase more to have on hand for multiple stitchouts and towels. Conveniently, Perfect Appliqué comes in 1- and 3-yard rolls and by the bolt.

The [Stabilizer Sampler](#) also comes with a piece of every stabilizer in the Sulky line. Within each towel tutorial are instructions for using some of the stabilizers within the Sampler pack. The pack on the left, below, is our 'old' look and the pack on the right is our 'new' look.
